# About Us:

David Cohen

Idan Rosenberg

Rany Whabi

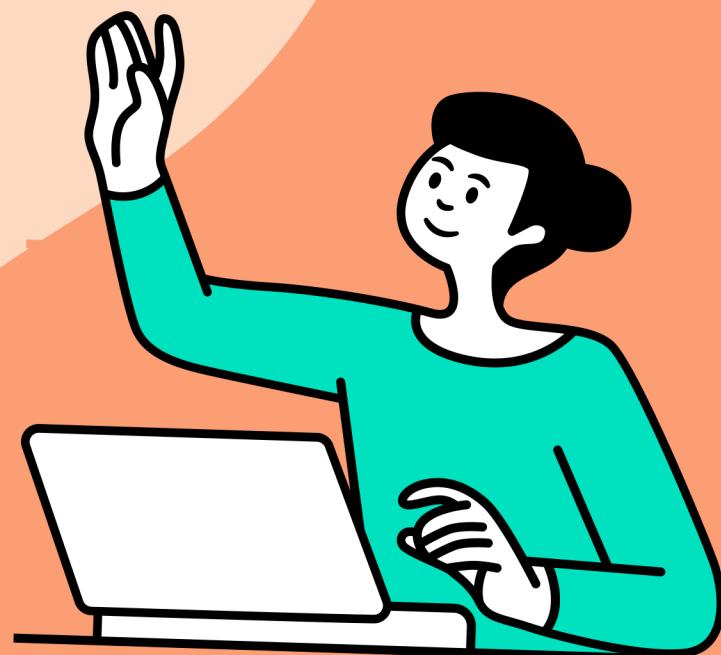

Yarden Gazit

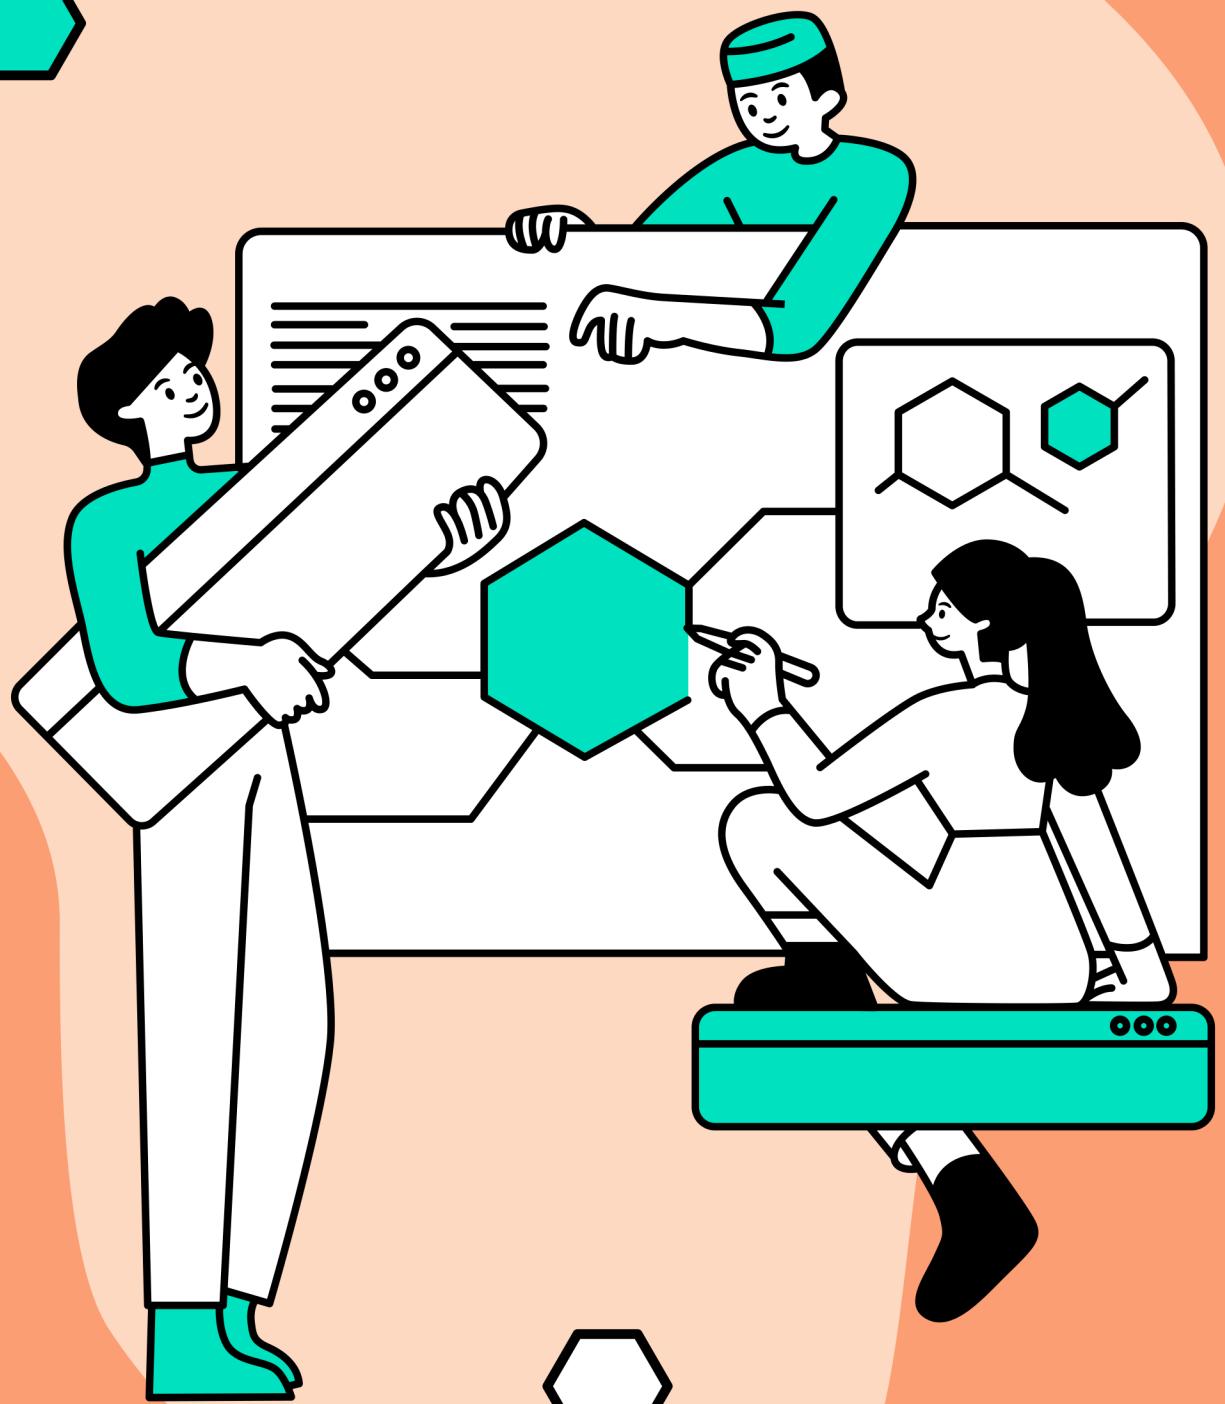

Shiraz Yom Tov

Shachar Levy

# The Idea

Building a platform that offers the ability to connect between students and tutores.  
The platform aims to provide a dedicated and better alternative to many Facebook groups.

## Goals

1

Ability to form study group of a variety of sizes according to students needs.

2

Exposure of students to a diverse group of tutors in order to find a tailor made learning experience that allows for personalised learning.

3

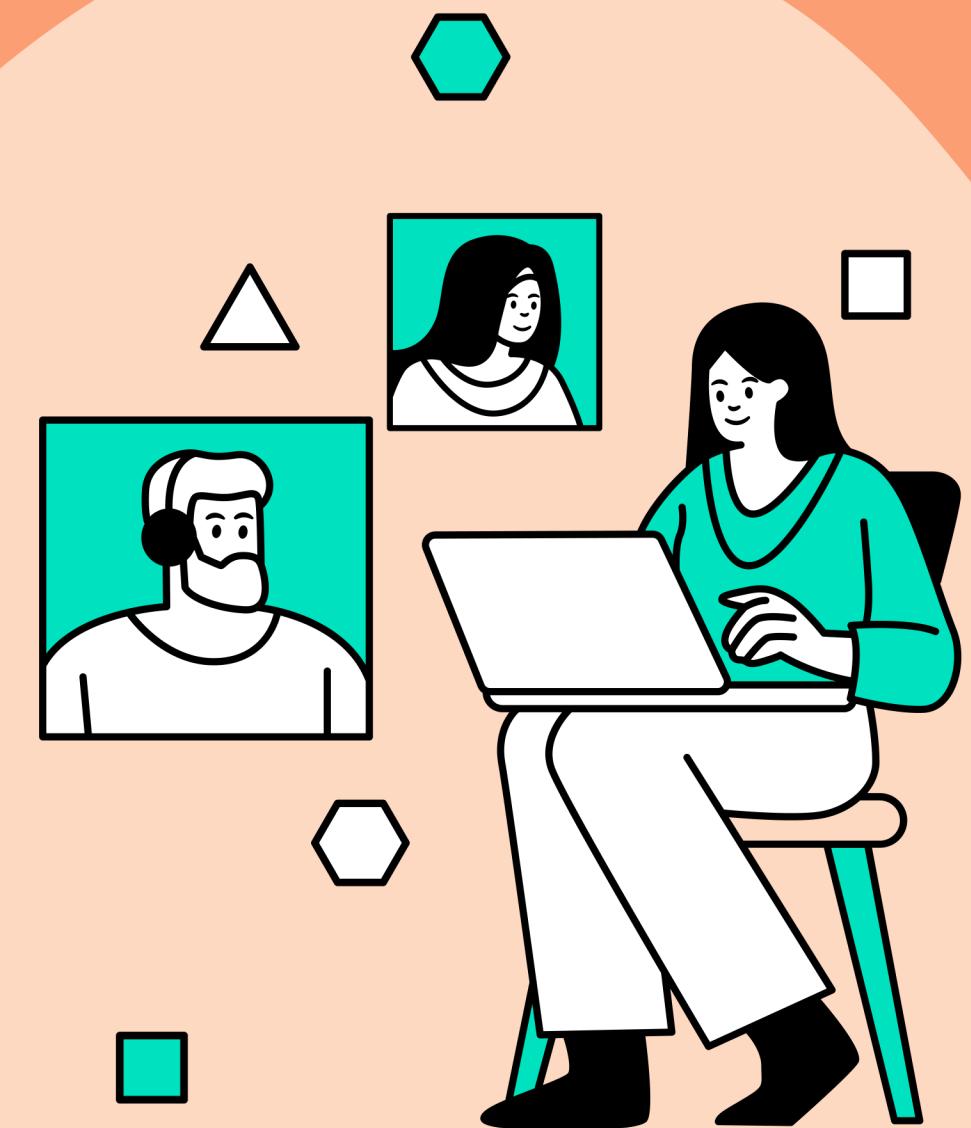

Tutores can make on the spot appointments and share and edit their schedule to allow for a more dynamic approach to their workflow.

# Contribution Guide

This file gives an overview of the contribution workflow from opening an issue, creating a PR, reviewing, and merging the PR.

## Main conventions:

- Each PR should include at most 5 commits.
- Make sure the PR passes CI checks. Run `pipenv run flake8 --max-line-length 120` and `pipenv run python -m pytest -v` inside your VM before submitting a new PR.
- Before submitting a PR for review, try applying the principle of single responsibility. If this code is doing more than one thing, break it into other PRs.
- Each pull request requires the approval of at least 2 contributors and has to be reviewed by the maintainers before merging.
- Use polite, respectful and clear language when commenting on or reviewing a PR.

# Features

1

## Chat

When there is a match between a tuteure and a student, a chat option will appear.

2

## Profile

2 types of profile are available:  
Tutor's profile and student's profile.

3

## Search

The search page will let users search for a tuteure in their desired field.

4

## Study Groups

The site will allow the creation of study groups that will be limited by the number of people as determined in the group's settings.

# Landing page (<http://localhost:8000> )

## High.Teach

A platform for connecting students and tutors.

HighTeach is a social network which enables tutors to expose themselves through dynamic connections with potential students, based on fields or special needs.
